Boho

RUG

Generated: 03/11/2026

Boho is a contemporary rug made from 100% high-quality Afghan wool and knotted entirely by hand. The design brings traditional Afghan weaving techniques into a design language conceived for contemporary interiors.

Hand knotting gradually builds the surface of the rug and connects each piece to the handwork of artisans. The artisanal technique shapes the design while also contributing to the product's strength and long-term durability.

Afghan wool retains a natural, tactile presence. The fibre gives the surface depth and allows the rug to introduce a textured quality into the ambience that can be experienced both visually and through touch.

Textile tradition and contemporary design coexist, each retaining its own character. The traditional knotting technique is preserved in the construction, while the rug's proportions and look make it the perfect choice for contemporary ambiences.

Handcraftsmanship gives Boho a character that goes beyond a uniform, mass-produced surface. Each knot contributes to the whole, making the time devoted to its creation a tangible part of the product's value.

Boho broadens HESSENTIA's exploration of textiles through Afghan wool and hand knotting, bringing an age-old craft tradition into dialogue with a contemporary vision of living.
