Nova

NIGHT TABLE

Nova is a bedroom night table characterized by a single drawer, upholstered with leather, and metal details at the base of the structure. It belongs to Nova collection, which includes beds in different sizes, a bench, a vanity, a console and other coordinated pieces.

The drawer front features a bas-relief design, characterised by a square profile with softly rounded corners. This decoration introduces depth and makes the leather surface one of the main elements of the design.

Nova is available in right and left configurations. In the two versions, the metal parts are positioned in opposite directions at the base, creating a mirrored pair on either side of the bed.

The metal structure supports and visually lightens the upholstered drawer. The contrast between the precision of the metal and the softness of the leather reinforces continuity with the other products in the collection.

Some parts of the metal are hand-decorated to create a sculptural effect.

The top of the night table is available in marble. Natural stone introduces veining and chromatic variations that can be coordinated with the colour of the leather and the metal finish.

Handmade in Italy, Nova combines leather, marble and metal in a compact, carefully detailed composition.
