Donald

POUF

Generated: 24/11/2026

Donald pouf is a contemporary furniture accessory with a trumpet-shaped base, defined by the combination of an engraved metal base and a soft Mongolia fur seat. It belongs to Donald collection, which also includes coordinated coffee tables, bedside tables and a vanity desk.

The structure narrows and widens along a curved profile, making the base a sculptural, recognisable element. Metal is shaped and artistically engraved to create a three-dimensional decoration.

A subsequent polished finish enhances the marks of craftsmanship and creates reflections that follow the geometry of the volume. The Mongolia fur seat gives softness and tactile depth, contrasting clearly with the metal base.

Donald can be used as an additional seat or an accessory in living areas, lounge bars and hospitality spaces. It can be matched with other elements of the same collection.

Handmade in Italy, Donald combines artistic metal craftsmanship, material contrast and manufacturing precision.
