Adone

TABLE

Adone is a sophisticated, striking HESSENTIA table designed to play the leading role in elegant contemporary dining areas. Its rounded marble top represent a substantial, natural surface, enhanced by metal that follows its outline and emphasises its thickness.

In larger sizes, the top is divided into two sections to enhance the natural veining of the marble through an open-book effect, creating striking visual symmetry and unique patterns in every piece. The natural uniqueness of marble gives each table a distinctive appearance, making the surface a decorative and architectural element.

The base introduces an additional layer of detail: four elements covered in metal and leather with vertical and horizontal incisions create a refined geometric rhythm. Adone thus interprets the table as a balance between fine marbles, metal, leather and contemporary Made in Italy design, consistent with HESSENTIA's exploration of materials, finishes and proportions.

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
