Laguna

COFFEE TABLE

Laguna arises from HESSENTIA's exploration of artistic glass and its connection with Murano glassmaking tradition. This material interprets light, colour and transparency through changing reflections and colour variations that give each element a different appearance.

Glass takes on a luminous, vibrant presence that engages with the ambience and viewing angle. The glass top enhances depth, visual lightness and colour intensity, beyond its support role.

Available in different sizes and heights, Laguna can be used individually or in more complex living compositions. Within HESSENTIA's world, it combines Murano glass, visual exploration and contemporary Handmade in Italy design in an elegant, sensitive coffee table.
