Otto

COFFEE TABLE

Round Otto coffee table interprets the Moon rock finish through a compact, sculptural shape, bringing a surface rich in reflections and depth into the living area. The metal base, shaped like a downward-facing bowl, is hand-decorated through an engraving technique that gives it a three-dimensional appearance.

The thick wooden top is covered with an extremely thin aluminium sheet shaped over the hand-creafted surface with radial patterns interrupted by diagonal marks. Resin finishing makes the upper surface flat and functional while preserving the three-dimensional strength of the craftsmanship along the edge.

Within HESSENTIA's design language, round Otto is an artistic, striking coffee table combining metal, light and handwork in a strong, elegant and deeply recognisable presence.
