Momo

COFFEE TABLE

Momo is one of HESSENTIA's iconic coffee tables, born from an exploration of resin and its ability to transform colour, light, transparency and shape into an immediately recognisable presence. Handcrafted resin combines technical rigour and artistic sensitivity, giving each element a different appearance. Round and square versions in different sizes and heights allow dynamic, customised living compositions.

The larger versions are supported by three legs, balancing the top and enhancing the product's sculptural character.

Within HESSENTIA's design language, Momo is an expressive, contemporary coffee table that combines material experimentation, a broad colour range and compositional freedom for living ambiences with a strong identity.
