Holly

CHAIR

Generated: 25/11/2026

Holly is a contemporary upholstered chair in which comfort, capitonné tufting and a metal structure define a precise, recognisable identity.

The seat and backrest form a soft, enveloping volume designed to follow the body and provide support. Generous proportions and continuous curves make Holly suitable to dining areas, as well as meeting rooms, restaurants and contemporary hospitality ambiences.

Capitonné tufting takes centre stage throughout the composition: the regular sequence of tufted stitches shapes the surface, creates depth and introduces a three-dimensional rhythm that enhances the tailored quality of the upholstery.

The upholstered element is supported by metal legs with ovoid shape, which give visual lightness to the structure and create a clear contrast with the softness of the seat.

The distinctive geometry of the base makes Holly suitable for pairing with round tables, creating a composition balanced in its proportions, directions and movement.

The chair is available with a wide range of leather or fabric upholstery and metal finishes in order to be adjusted to suit the interior design setting.

Handmade in Italy, Holly interprets the contemporary chair through capitonné tufting, enveloping comfort and the precision of its metal structure. It is designed to combine decorative presence, functionality and manufacturing quality.
