Pedro

COFFEE TABLE

Generated: 09/11/2026

Ribbed Pedro coffee table enhances the beauty of pottery through a more vibrant, textured vertical decoration. Its simple shape reveals the strength of the craftsmanship, where glaze combined with natural earths creates deep shades and colour variations during firing.

Vertical ribbing introduces rhythm, shadow and movement, giving the compact volume a stronger decorative presence. Each piece retains subtle differences in tone and surface appearance, making pottery a lively material that can never be replicated completely.

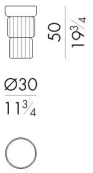

Within HESSENTIA's design language, ribbed Pedro is a sculptural, sensitive coffee table combining minimal shape, artisanal handwork and colour exploration. It completes the living area with character, balance and Handmade in Italy authenticity.
