Ben

TABLE

Generated: 03/11/2026

Ben is a HESSENTIA table with a strong material identity, entirely covered in hand-worked jute. Its natural, tactile and subtly irregular surface gives the piece an authentic character, making each table unique in appearance and in contact with the material.

The top, divided into three or more sections according to size, introduces an elegant, restrained visual rhythm. U-shaped bases support the composition with an architectural presence, balancing simplicity of shape, natural texture and strength of design.

Ben interprets the table as a textured surface for gathering. Handcrafted jute strengthens the connection with Italian craftsmanship and HESSENTIA's exploration of natural materials, tactile finishes and contemporary Made in Italy furniture.

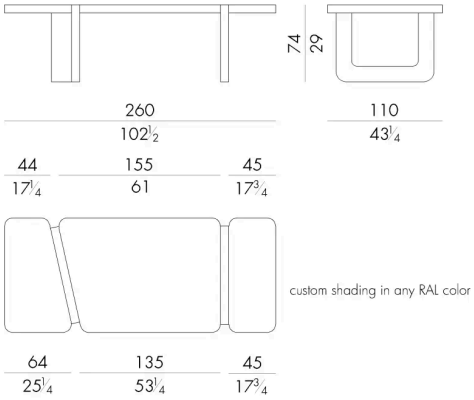

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
