Otto

TABLE

Generated: 25/11/2026

Otto is a round HESSENTIA table that brings the evocative strength of the Moon rock finish into the space. Its identity arises from the meeting of a metal base composed of two opposing bowls and a wooden top covered in a thin metal sheet shaped by hand into a dynamic, three-dimensional pattern.

The surface appears to move under the light: reflections, visual vibrations and perceptual variations run across the top, transforming it into an ever-changing textured landscape. The compact, sculptural base supports the thick top, giving the table a contained yet intensely expressive shape.

Otto interprets the round table as the visual and social centre of the space. Handcraftsmanship, surface variations and finish quality give each piece a unique appearance, strengthening HESSENTIA's language of art, material and contemporary Made in Italy design.

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
