Almaglam

ARMCHAIR

Generated: 29/11/2026

For HESSENTIA, Almaglam is an upholstered armchair with sinuous, enveloping shapes, designed to offer a deep and welcoming seat. Curved lines and generous volumes follow the body, creating a soft and recognizable look.

The continuity between seat and back defines a compact silhouette in which each element appears to shape itself around the person. The deep proportions reinforce the sense of comfort and make the armchair suitable for living areas, bedrooms, lounges and contemporary hospitality interiors.

Compared with Alma version, Almaglam introduces a stronger decorative component through buttons and contrasting trim. The buttons articulate the surface of the seat and create a discreet rhythm, while the border highlights the shape of the armchair, emphasizing its curves and proportions.

The upholstery can be in leather or fabric and customized through different colour combinations. Tone-on-tone trim creates a more measured result, while a contrasting border makes the seat and the tailoring character of the design more evident.

Handmade in Italy, Almaglam interprets the contemporary armchair for HESSENTIA through comfort, softness of volume and precision of detail. It is a customizable seat in which upholstery workmanship and formal research contribute to defining an elegant, distinctive identity.
