Talos

COFFEE TABLE

Talos coffee table is defined by the balance between horizontal and vertical volumes, creating a simple dialogue between marble and metal. Its identity is founded on clear proportions, broad surfaces and a material contrast that enhances the natural strength of marble and metal.

The marble top introduces constantly varying veining, depth and colours, while the metal structure, with its refined, expressive hand-worked finish, supports the composition with rigour and precision. Their meeting creates a harmonious balance between solidity, light and visual lightness.

Within HESSENTIA's living ambiences, Talos is an elegant, restrained coffee table with a discreet yet striking contemporary look. It brings together the expressive strength of marble, the precision of metal and sensitivity to design.
