Domino

STORAGE UNIT

Domino reinterprets the design language of the collection of the same name through a lower storage unit with a strongly horizontal shape. Its elongated proportions draw a precise line in the space, immediately distinguishing this configuration from the 13400/A version.

The exterior is made with decorative resins, coloured pigments and natural materials. Textured vertical lines run across the drawer fronts and doors, creating a three-dimensional pattern on which light produces subtle shadows and variations in depth.

Resin worked with artisanal care and attention to detail gives the storage unit a strong identity, with variations that make each piece unique.

The metal elements follow the vertical direction and contribute to the opening system. Their rhythm subtly interrupts the horizontal shape of the piece, creating a graphic tension between surface, structure and detail.

Domino is finished on all four sides and can therefore stand freely in the space, independently of a wall. Ideal between living and dining areas, it divides without enclosing and organises while preserving visual continuity.

Resin enhances this relationship with the ambience. Colour, relief and light make the texture changeable, giving the storage unit a character that varies with the viewing angle.

Within HESSENTIA's world, Domino brings storage unit into the architecture of the space, balancing horizontal proportions, vertical rhythm and material depth.

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
