# Lisbonaglam

**CHAIR**

Lisbonaglam is a more contemporary version of Lisbona chair, reinterpreted through a unified colour scheme. Fabric, lacquered wood and metal share the same shade, creating visual continuity that makes the structure compact, balanced and immediately recognisable.

The proportions provide comfort and support while retaining a light outline. Seat, backrest and legs relate through a simple design in which each element contributes to a precise, restrained silhouette.

The monochromatic approach softens contrasts between materials while preserving their different natures. Fabric introduces softness and tactile depth, lacquer enhances the continuity of the wooden surfaces, and metal details complete the design with more restrained reflections.

Compared with Lisbona, characterised by the alternation of maple wood, leather, metal and plissè embroidery, Lisbonaglam develops a more uniform, graphic appearance. Colour thus becomes an active part of the design, making the chair to suitable for different interior compositions.

Upholstery can be chosen among a wide range of different textured fabrics, coordinating the seat colour with the structure. This allows tonal arrangements that engage with tables, walls and materials within the ambience.

Handmade in Italy, Lisbonaglam interprets the contemporary chair through colour balance, comfort and customisation. It is designed for dining rooms, living areas, restaurants, meeting rooms and hospitality projects.
