Islaout

MODULAR SOFA

Islaout is a modular seating system aimed to design contemporary islands of relaxation for outdoor sets.
Thanks to its compositional versatility, with just a few modular elements it is possible to create linear, angular or semicircular configurations, suitable to any space requirement, from terraces or verandas to boats.
The combination of soft volumes, upholstered in lively outdoor fabrics, gives a cosy and dynamic look, while the design of the base, raised by four cylindrical feet in iroko wood, makes each element independent from the others.
Comfort is guaranteed by the removable cushions with removable covers, designed to offer absolute relaxation and practical maintenance. To complete the composition, the circular Islaout sofa can be combined.
We recommend the use of the Safe Cover, ideal for maintaining the quality of the materials.
The product can also be used indoors.

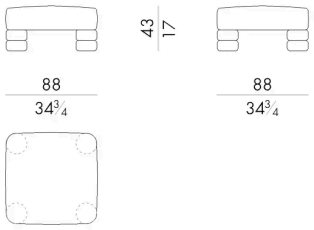

The **Hessentia Outdoor collection** is designed and intended exclusively for use in covered outdoor spaces protected from weather agents, such as verandas, porches, and covered terraces.
To preserve the aesthetic, functional, and material qualities of the products over time, weekly routine maintenance is highly recommended.
Furthermore, any food and drink residues, leaves, flowers, pollen, or bird droppings should be removed promptly to prevent prolonged contact with the surfaces from compromising the long-term preservation of the products.
