Hug

ARMCHAIR

Hug is a contemporary armchair belonging to the HESSENTIA collection of the same name, which also includes sofas, poufs and beds. Inspired by the design language of Hug sofa, it evokes its volumetric character, soft shapes and the enveloping sensation suggested by its name into an individual seat.

The seat is enclosed by a back with an oval section that develops as a continuous volume around the body of the armchair. This construction defines a compact and recognizable silhouette designed to provide support, comfort and a sense of protection.

Rounded lines and continuity between back and armrests soften the solidity of the volume and give the armchair a gentle, measured character. Hug interprets comfort not only through padding, but through the way the shape follows the person and creates an intimate space.

The armchair is available upholstered in leather or fabric and can also be decorated with raised diamond-pattern embroidery. This tailoring workmanship animates the surface, introduces tactile depth and highlights the artisanal skill with which the upholstery is shaped.

Hug armchair can be used as a stand-alone element or paired with the sofa and other products from the same collection, creating interiors coordinated in shape, proportions and materials. Customization options make it possible to adapt upholstery, colours and finishes to different residential and hospitality projects.

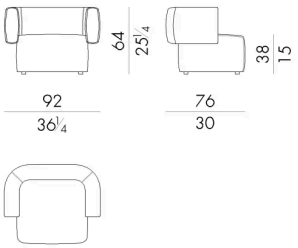

Handmade in Italy, Hug expresses the HESSENTIA vision of furniture design founded on the balance between comfort, continuity of volumes and tailoring workmanship of surfaces.
