Sydney

COFFEE TABLE

Sydney arises from HESSENTIA's experimentation with artistic pottery and its sculptural presence. The material is shaped to evoke fossil shells, creating an organic, vibrant surface rich in movement.

The pottery part is glazed, also in blue or green shades, before kiln firing, creating deep tones and reflections that enhance its artistic character. Each table gains a strong decorative identity in which colour, material and handwork engage naturally.

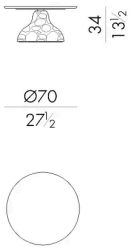

Available in two sizes, Sydney becomes a distinctive coffee table within HESSENTIA's world, combining natural inspiration, ceramic craftsmanship and contemporary sensitivity.
