

Eos is a design table that combines innovation and craftsmanship. The table top, with its amorphous profile, is the result of a meticulous sequence of casting of resin-based materials, creating a fluid and organic surface. The three metal legs rise from the base, like pillars that seem sculpted in light, thanks to the fine craftsmanship of the metal. The artistic technique employed makes each table unique, a masterpiece that expresses research into materials and techniques, adding personality and uniqueness to any room.
