

Momo collection of coffee tables is characterised by a contemporary and sophisticated aesthetic, suitable to enrich any ambience with a unique and distinctive design. Obtained thanks to a sequence of casting of resin-based materials, Momo coffee tables are available in different sizes: round or square, with a single central leg or with three legs. You can also choose between the two-tone or the monochromatic versions. What makes Momo truly unique is the technique used for their creation, which leads to a variation of the textured effect in each coffee table, transforming each piece into an unrepeatable artwork.
