Twigglam

ARMCHAIR

Generated: 03/11/2026

Twigglam is a contemporary seating collection comprising a small armchair and a stool, defined by a structure of slender, shaped metal rods and a decorative button on the backrest that gives it a distinctive tailored identity.

The metal structure wraps around the seat and supports the backrest through a continuous, light and recognisable design. Curved rod lines define the shape while revealing its structure, balancing geometric precision with comfort.

The metal is decorated with an artisanal frosted finish that creates subtle surface variations and reflections. This finish gives the structure greater expression, highlighting its handcrafted curves and connections.

Compared with Twig, Twigglam is distinguished by the decorative button on its backrest. This detail highlights the upholstery craftsmanship and gives the seat a more refined character while preserving its lightness of form.

The collection includes a small armchair designed for dining rooms, living areas, bedrooms and hospitality ambiences, and a stool that follow the same design language in a taller configuration though for counters, islands and spaces for socialising.

Upholstery, colours and metal finishes can be customised to suit the interior design setting, creating tonal combinations or contrasts between structure, seat and button.

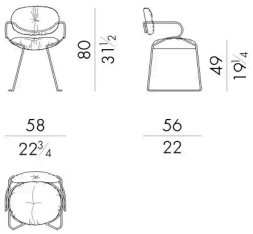

Handmade in Italy, Twigglam brings together metal craftsmanship, comfort and tailoring precision. The decorative button becomes a restrained, recognisable feature within this seating collection.
