Millerino

COFFEE TABLE

Millerino is a refined reinterpretation of the iconic Miller, bringing the collection’s distinctive motif into a more compact, light and versatile form. Finished entirely in polished chrome, it has a luminous, contemporary look that sits naturally in living ambiences and lounge areas.

The top rests on a slender cylindrical column extending to the base, which is clad in metal rods placed side by side. This detail evokes the iconic language of the Miller collection, creating an elegant vertical rhythm in which metal becomes a decorative surface, reflection and design feature.

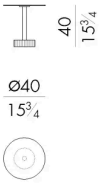

Available in two sizes, Millerino can be used as an occasional coffee table beside sofas and armchairs or as a support surface in more complex living compositions. Within HESSENTIA’s world, its discreet yet recognisable presence combines functionality, polished chrome and continuity with the iconic Miller collection.
