# Cubotto

**STORAGE UNIT**

Generated: 03/11/2026

The Cubotto storage unit is a compact, sculptural piece, characterized by its flap doors which define its functionality. The textural appeal of the bronze, achieved using the ancient technique of sand casting, is complemented by a palette of vibrant colours, creating a dialogue between tradition and modernity. Available in various sizes, Cubotto fits seamlessly into different settings while maintaining a distinctive presence.

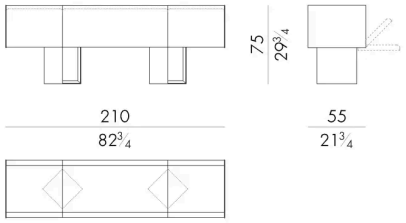

**HESSENTIA can customize this piece to suit your project needs. Some limitations apply.**
