Voyage

POUF

Voyage pouf is a contemporary furniture accessory with a compact, recognisable design inspired by traditional travelling seats, expressed by its simple lines, balanced proportions and distinctive cow leather upholstery with pony-look effect.

The base is composed of two elements that cross near the seat. This intersection creates a dynamic, characteristic motif, making the structure one of the design's principal features.

The curves of the base follow the upper volume, balancing support, movement and visual lightness. The structure remains clearly visible and recognisable from different viewpoints.

The upholstered seat provides comfort while retaining compact proportions. Cow leather with pony-look effect introduces natural variations in tone and texture, giving the pouf a remarkable visual and tactile presence.

The contrast between the precision of the curved elements and the irregular appearance of the upholstery defines Voyage's identity. Each material retains its expressiveness while relating to the others through a restrained composition.

Voyage can be used as an additional seat or as a complementary element alongside sofas and armchairs. Its small dimensions suit contemporary living areas, bedrooms, lounges and hospitality ambiences.

Handmade in Italy, Voyage combines tailoring craftsmanship with precision of construction.
