Coco

CHAIR

Generated: 03/11/2026

Coco is an upholstered swivel chair belonging to the HESSENTIA collection of the same name. It draws on the full, sinuous and enveloping shapes of Coco armchair, reinterpreting them in more compact proportions, suited to dining and living areas and home offices.

The generous seat and curved backrest follow the body through a continuous profile designed for comfort and support. Soft lines define a balanced, recognisable volume that sits naturally around a dining table or as an individual seat in different interior settings.

The swivel metal base introduces movement and functionality, giving visual lightness to the upholstered part. The contrast between soft upholstery and the precision of the structure beneath creates a balance of comfort, versatility and an exploration of form.

The swivel function allows the chair to adapt easily to different uses, facilitating movement among the table, conversation and surrounding space. This makes Coco suitable for home offices, meeting rooms and contemporary hospitality ambiences as well as dining rooms.

Coco can be customised with a selection of fabrics, leathers, colours and finishes, enhancing the continuity of its curves and coordinating the chair with the table and other elements in the ambience.

Handmade in Italy, Coco interprets the contemporary chair through enveloping shapes, comfort, movement and attention to material craftsmanship.
