

Abby is a decorative mirror divided into two symmetrical parts placed side by side. Resting on the ground against a wall, it gives a great atmosphere to a living area, but it can play a decorative and functional role near an entrance. The frame, impressive for its size, is made of precious glass cast in plate by master glassmakers in the area of Venice. All the mirror frame is marked by flexuous movements like the sea ripples. It is made even in rectangular shape with a smaller size.
