Miller

COFFEE TABLE

Available in different sizes and heights, Miller with metallic back-painting enhances Murano glass through a refined balance of transparency, depth and reflection. Smooth to the touch, the top reveals an internal surface enlivened by special metallic pigmentation that enhances the glass's three-dimensional quality and luminosity.

Its strength arises from the complexity of the material: thick glass becomes an expressive element that changes with light, ambience and viewing angle, beyond its role as a support surface. Reflections, depth and tonal variations give each table a striking, constantly changing presence.

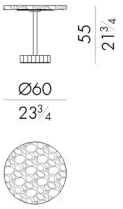

The base composed of slender metal rods placed side by side supports the glass top with an elegant, rhythmic vertical motif. Within HESSENTIA's world, Miller represents a distinctive exploration of artistic glass, bringing Murano tradition, metal and contemporary sensitivity together in an iconic piece.
