Miller

COFFEE TABLE

Available in different sizes and heights, Miller is one of HESSENTIA's most iconic products, born from the meeting of Murano glass and metal in a unique, strongly recognisable shape. The large, thick glass top arises from the desire to reinterpret an ancient tradition through a contemporary, unconventional language.

The complexity of its craftsmanship gives Miller a distinctive character. A metal plate supporting the top enhances reflections beneath the glass, creating a visual effect reminiscent of ripples on the sea. Light passes through the material, reflects and multiplies, making the table a lively, changing surface.

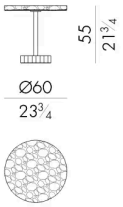

The cylindrical base, consisting in slender metal rods placed side by side, adds rhythm and lightness beneath the striking top. Within HESSENTIA's design language, Miller is a sculptural, refined coffee table combining Murano glassmaking, technical experimentation and Handmade in Italy design.
