Nora

COFFEE TABLE

Nora interprets the meeting of marble and Vienna straw through a soft, contemporary design language. The square-weave texture introduces a light yet recognisable look that engages with the natural strength of the marble top, giving the coffee table a distinctive character.

Curved lines define a fluid form, while vertical elements appear to barely touch the top, creating a delicate visual tension. This interplay of interlocking shapes balances structure and top, giving material character while keeping the composition light.

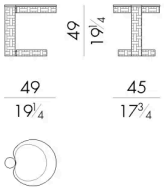

Available in different sizes, Nora can be used individually or in more complex living compositions. Within HESSENTIA's world, Vienna straw is reinterpreted for contemporary interiors, transforming traditional craftsmanship into a decorative element combining natural character, proportion and Handmade in Italy design.
