Lulu

ARMCHAIR

Generated: 24/11/2026

Lulu is a contemporary armchair with broad, enveloping shapes, designed to provide a generous seat and a recognizable look. Its profile ideally recalls the initial of its name, transforming the structure into a continuous, soft and dynamic sign.

The substantial volume of the upholstered part defines a welcoming seat, conceived to support the body and encourage an immediate sense of comfort. The soft proportions are balanced by the slimmer line of the metal armrest, which follows the profile of the armchair and introduces a precise, lightweight element.

The contrast between upholstery and metal creates a balance between thicknesses, materials and functions. The textile surface expresses softness and tactile depth, while the metal armrest draws the outline of the seat and reinforces its design identity.

Lulu can be customized through a selection of natural leathers, finishes and colour combinations, adapting to different interior projects. The two available sizes also make it possible to choose between a more compact version and a larger seat according to the space and living composition.

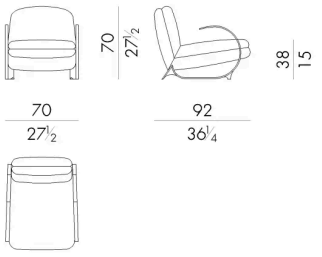

Handmade in Italy, Lulu is conceived within the HESSENTIA world to sit alongside contemporary sofas, complete lounge areas or become a stand-alone element in residential and hospitality interiors. It is an armchair in which comfort, proportions and the precision of the metal detail enter into dialogue.
