Morfeo

STORAGE UNIT

The storage unit Morfeo has essential lines that makes it formally tidy and particularly neutral to complete elegant environments. The two symmetrical doors and the central drawer are carefully covered in leather. A series of parallel horizontal engravings mark all the elements forming the external part and represent the distinctive element of this piece. The clean design is maintained by the choice of a metal profile as a functional handle for doors and drawers which enhances the aesthetics of the storage unit. The central open compartment has a lacquered finish available in a variety of colours that can be easily combined with themarbles used for the top and the base on the ground. The low and elongated proportions of this storage unit make it easily suitable for the sleeping area in combination with the night table of the same collection. Led lighting is provided in the open compartment.
