

Nexum bookcase is an example of design where versatility and quality materials come together to create a unique piece of furniture.

The modular structure, characterised by metal pillars, is designed for both ceiling and wall mounting, making it versatile to create different compositions, customisable in length and height, to meet different requirements both aesthetic and functional.

In addition to the concrete shelves available in a variety of colours, it is possible to add versatile elements such as lacquered storage modules with flap shutters or double-opening doors, which guarantee excellent organisation and enrich the bookcase.

The possibility of combining lacquered shelves or storage units with concrete shelves makes Nexum the best choice to create a distinctive set matching with the desired style.

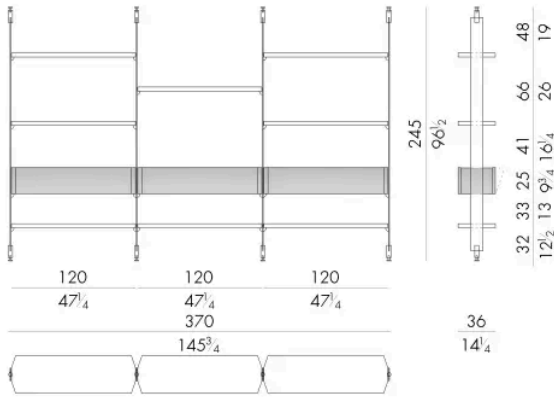

**HESSENTIA can customize this piece to suit your project needs. Some limitations apply.**
