Dune

MODULAR SOFA

Generated: 25/11/2026

Within the HESSENTIA world, Dune modular sofa interprets the living area through rounded, enveloping lines shaped by sinuous proportions that create a soft, sculptural presence. The design combines comfort, surface continuity and compositional freedom, transforming the sofa into an element able to organise the space without relying on rigid geometries.

Modularity is a central component of Dune sofa: the different elements make it possible to develop configurations of varying sizes and proportions, adapting the composition to the characteristics of the interior and to the way the living area is used. The combination of modules preserves the continuity of the design and allows the curved shapes to unfold naturally through the space.

Generous volumes and enveloping back create a sense of comfort and welcome. The softness of the lines follows the development of the seating and makes the composition recognisable from different viewpoints, enhancing the sofa even when it is placed at the centre of contemporary living spaces or large lounge areas.

This modular sofa can be configured with linear elements and modules of different proportions, creating either more compact or more articulated compositions. This flexibility allows personalised living scenarios to be developed while maintaining a coherent formal language defined by the balance between volume, curve and continuity.

Dune modular sofa can be upholstered in leather or fabric. The possibility of choosing both configuration and upholstery allows the design to adapt to contemporary living spaces of different sizes and characteristics.

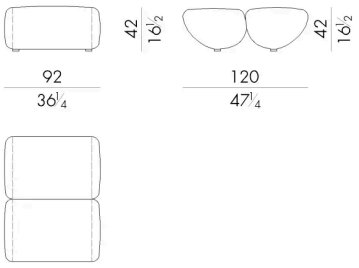

Handmade in Italy, Dune interprets contemporary comfort through organic shapes, modularity and enveloping proportions, expressing a vision of living in which the sofa plays the leading role in the architecture of the space.
