# Snap

**BED**

The bed belongs to Snap collection and can be coordinated with the matching night tables, designed to follow the curvature of the headboard.

The continuity of the shape makes the bed read as a single volume: the bed frame and headboard do not appear as separate elements, but create an enveloping composition that follows the mattress and defines the space dedicated to rest.

The upholstery is made without visible seams, a choice that keeps the surface visually continuous and enhances the curved geometry of the design. The absence of interruptions accentuates the softness of the structure and strengthens its sculptural presence.

This bed can be entirely upholstered in leather or fabric. Customising the upholstery changes the perception of the volume, making it more compact and defined in leather or softer and more tactile in fabric.

The shape of the bed is particularly expressive when placed at the centre of the room or in a space where it can be viewed from different angles.

Snap night tables can be positioned along the curve of the headboard. The result is a coordinated composition in which the elements of the bedroom communicate through the same geometry.

Handmade in Italy, Snap interprets contemporary bedroom design through continuous shape, upholstery without visible seams and integration with elements from the same collection.

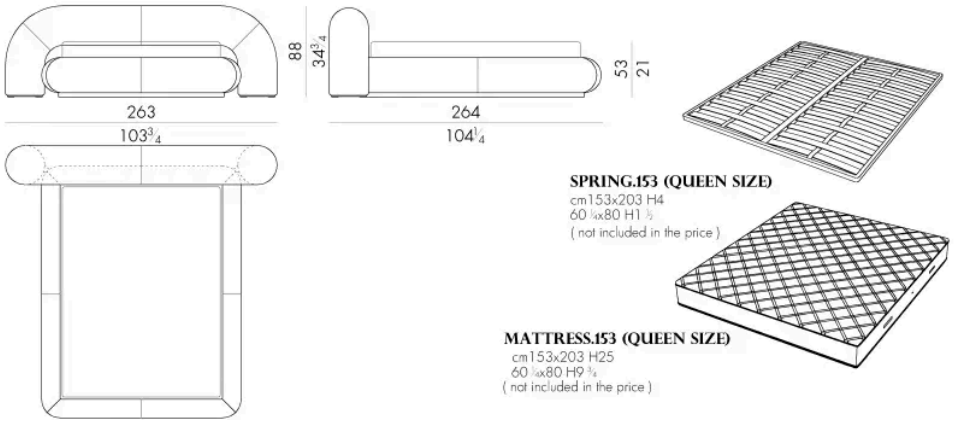

Within the HESSENTIA world, Snap is a bed with a strong visual impact, distinguished by its imposing, sculptural shape and by soft, generously rounded lines.
