Laguna

TABLE

Laguna is a HESSENTIA table inspired by the Venetian lagoon, a landscape suspended between water, light and craft heritage. The reference to Murano evokes an artistic glass tradition that has developed a language bringing together material, colour and reflection over time.

The artistic glass elements take shape through high-temperature craftsmanship and are subsequently enhanced by a colouring process that creates constantly varying tones, reflections and shades. Each piece retains its own identity, connected to the nature of glass, light and the sensitivity of handcraftsmanship.

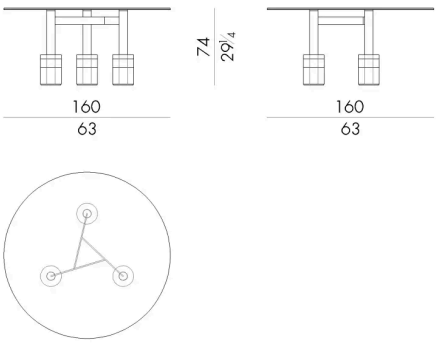

In the round version, Laguna encourages a more fluid relationship between people and space. Its circular shape enhances the table's convivial character, while artistic glass introduces a luminous, vibrant and richly textured presence, in balance with HESSENTIA's contemporary Made in Italy design.

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
