Luke

COFFEE TABLE

Luke coffee table was conceived as an ideal complement to the soft, generous shapes of Lowell modular sofa. Its identity is focused on round shapes: from every viewpoint, the volume appears fluid, continuous and welcoming, introducing a discreet yet recognisable presence into the living area.

The structure, available in different glossy or matt lacquered finishes, allows its character to be adjusted through colour. The marble top adds natural depth and decorative value, balancing the veined marble surface with the colour of the structure.

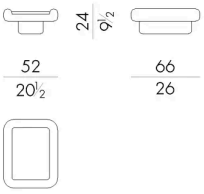

Available in two sizes, Luke can be used individually or in arrangements beside sofas and lounge seating. Within HESSENTIA's design language, it combines soft proportions, selected marble and contemporary Handmade in Italy sensitivity in a simple, sophisticated coffee table.
