Nova

VANITY

Nova vanity desk is a furnishing element dedicated to personal care, characterized by a double metal base and a drawer unit upholstered with leather. It belongs to Nova collection and evokes the metal geometries and attention to detail that define the bed, night table and other coordinated pieces.

The double base is sculpted into shape and finished with either glossy or matt surfaces. Some sections are handcrafted to create a sculptural effect, transforming metal into both a structural and expressive design element.

The drawer unit is upholstered with soft leather, introducing a tactile contrast with the precision of the bases.

The generous marble top provides a surface dedicated to personal care and make-up. Its proportions allow accessories and objects to be organized while maintaining a visually ordered surface.

This vanity desk can be placed in the bedroom, a walk-in closet or dressing room and coordinated with the night table, bed and bench from the same collection.

Handmade in Italy, Nova interprets the role of a make-up station with attention to every functional requirement.
