# Nova

**COFFEE TABLE**

Round Nova coffee table interprets marble through a soft, compact and refined geometry. The top, thinned around the perimeter, enhances the natural stone and gives it visual lightness.

The metal structure evokes the collection's distinctive motif, running through the design with precision and brightness. Artisanal sculptural finishing of some metal rings adds further uniqueness. The dialogue between marble and metal defines an elegant coffee table that completes the living area with a discreet yet recognisable accent.

Available in different proportions, round Nova coffee table can be used individually or with the rectangular variant. Within HESSENTIA's design language, it combines natural materials, soft geometry and Handmade in Italy design in a balanced, sophisticated presence.
