Heron

COFFEE TABLE

Generated: 03/11/2026

Heron coffee table in lacquer and metal interprets the living area through a light, versatile and contemporary presence. Its glossy lacquered top, with a rounded tray-like edge, introduces a soft, functional surface designed to complement sofas and armchairs.

Three cylindrical, telescopic metal legs, with alternating polished and brushed finishes, support the top and pass through it in a discreet, recognisable design. The structure forms a small architectural composition in which visual lightness, functionality and attention to detail coexist in balance.

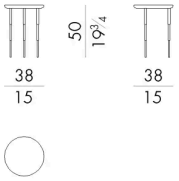

Within HESSENTIA's design language, Heron is a refined, adaptable coffee table combining the elegance of lacquer, the precision of metal and design sensitivity for contemporary, personalised living ambiences.
