

The armchair Janet has a light figure that revisits the art deco-style in the 1920s. The back rests on a thin metal sheet that fits into the body of the seat. With its raised small metal feet, manually engraved to add preciousness, the armchair Janet offers an enveloping and soft design. Available in leather or fabric and with finishes of various colours, this armchair is the element that can totally change the look of a room. Its harmonious lines make it particularly suitable for a residential living area or for a resort lobby.
