Sydney

COFFEE TABLE

Generated: 09/11/2026

The taller Sydney coffee table interprets artistic pottery through a slender, decorative and functional presence. Its design evokes fossil shells, transforming the material into an organic, vibrant element rich in visual movement. The marble base, carved from a single block, gives a solid, bold appearance.

Glaze, also available in blue or green shades, is applied before kiln firing, creating deep tones and reflections that enhance the product's character. Each piece retains the sensitivity of the manual process and a unique, recognisable character.

Designed as a support surface beside sofas, armchairs or lounge arrangements, tall Sydney introduces a sculptural colour accent into the space. Within HESSENTIA's design language, it combines ceramics, natural marble and contemporary Handmade in Italy design.
