Opus

TABLE

Opus is a HESSENTIA table with a minimal design, balancing simple lines, fine marbles and artistically cast metal details. Its look is restrained yet striking: the marble top defines a natural, sculptural surface, while the base highlights the material strength of marble combined with cast metal, showcasing rich textures, deep tones and artisanal finishes.

The dialogue between marble and artistic metal casting expresses one of HESSENTIA's most recognisable identities: the meeting of selected materials, handcraftsmanship and contemporary Made in Italy furniture. Natural marble veining and metal surfaces obtained through traditional sand casting technique make each table subtly different, giving Opus a unique visual and tactile character.

Opus interprets the table as an architectural element and a place for gathering. Its simplicity allows material and finishes to take centre stage, balancing rigour, Italian craftsmanship and contemporary design with sophistication.

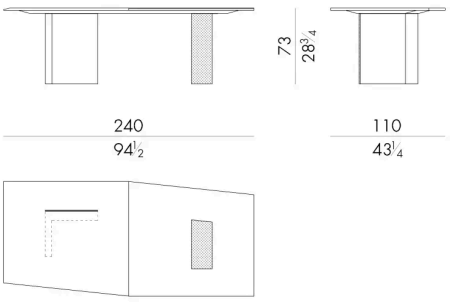

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
