Laguna

TABLE

Laguna is a HESSENTIA table inspired by the Venetian lagoon and the artistic glass tradition that developed around Murano. This timeless landscape gives rise to a design in which light, colour and material engage with the language of contemporary Made in Italy furniture.

Artistic glass craftsmanship creates elements with a luminous, changing look. The final touch of colour enriches the surface with reflections, depth and constantly varying tones, giving each table a unique appearance. Glass becomes a lively material that changes with the light and viewing angle, beyond its decorative role.

In the rectangular version, Laguna has a more architectural, linear presence suited to larger dining areas. The ordered geometry of the table meets the vibrant colour of artistic glass, balancing rigour, lightness and HESSENTIA's material identity.

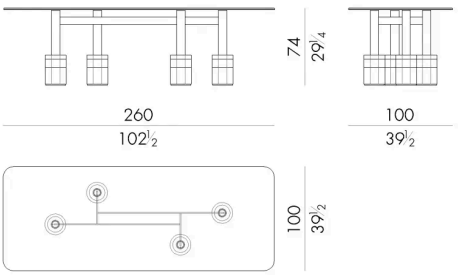

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
