Euphoria

CHAIR

Generated: 08/11/2026

Euphoria is a contemporary chair inspired by 1950s lines, reinterpreted through slender proportions, rounded volumes and a minimal design.

The upholstered backrest approaches the seat without fully joining it, creating a narrow gap that makes the design immediately recognisable. This detail gives the volume lightness and highlights the relationship between the chair's different parts.

The curved backrest follows the body and provides enveloping support, while the upholstered seat ensures comfort even during extended use. Its vertical proportions make Euphoria suitable for dining areas, meeting rooms, restaurants and contemporary hospitality ambiences.

The chair can be upholstered in leather or fabric and is also available with embroidery in a dotted pattern. The regular sequence of three-dimensional details enlivens the surface, creates tactile depth and introduces a three-dimensional effect that enhances the tailoring craftsmanship.

The upholstered section rests on slender metal legs available in different colour finishes. The lightness of the metal balances the softness of the seat and gives the silhouette a more slender appearance.

Euphoria is also available as a small armchair with armrests, allowing coordinated sets around the table or different seating options within the same ambience.

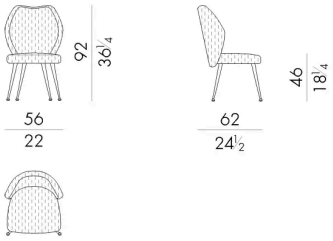

Handmade in Italy, Euphoria interprets the contemporary chair through design heritage, comfort, lightness of composition and tailoring precision.
