Petra

STORAGE UNIT

Petra is a storage unit composed of two symmetrical elements, characterized by an oval shape.

The textured surfaces evoke a mosaic of stone fragments that blend together: white concrete forms the base and incorporates inserts of Carrara and Giallo Siena marble chips, creating a rich, vibrant, and always unique texture.

A piece with a sculptural character, where material and form come together in a refined balance.

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
