Itaca

BENCH

Itaca bench is a versatile seat designed for covered, protected outdoor spaces. It belongs to Itaca collection, adopting its organic forms, slatted wooden structure and attention to comfort.

The structure is composed of wooden rods disposed in a regular sequence. These elements create an open, light framework supporting a soft upholstered cushion.

A small rear backrest provides support while preserving the continuity of the structure. The contrast between regular wooden elements and soft upholstery balances visual lightness with comfort.

Itaca, conceived as an individual seat or stool, is designed for panoramic terraces, verandas, boats and other covered, protected outdoor spaces but it is also suitable for contemporary interiors.

Handmade in Italy, Itaca interprets outdoor furniture through wood craftsmanship, versatility and continuity with the collection of the same name.

The **Hessentia Outdoor collection** is designed and intended exclusively for use in covered outdoor spaces protected from weather agents, such as verandas, porches, and covered terraces.
To preserve the aesthetic, functional, and material qualities of the products over time, weekly routine maintenance is highly recommended.
Furthermore, any food and drink residues, leaves, flowers, pollen, or bird droppings should be removed promptly to prevent prolonged contact with the surfaces from compromising the long-term preservation of the products.
