Miller

COFFEE TABLE

Available in different sizes and heights, Miller with a metal plate and metallic back-painting brings HESSENTIA's most expressive exploration of Murano glass into a single piece. The thick top, smooth to the touch, is enlivened by its bottom part, where special pigmentation enhances reflections, depth and three-dimensionality.

The metal plate supporting the top enhances this effect, transforming light into subtle movement reminiscent of delicate water ripples. Glass becomes a lively material: transparent, deep and luminous, with a constantly changing presence in the space.

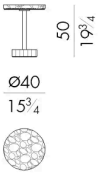

The base composed of slender metal rods placed side by side completes the table with a light, sophisticated vertical motif. Within HESSENTIA's design language, Miller is a unique design signature: an iconic product combining Murano glassmaking, metal, manufacturing complexity and a deeply recognisable contemporary sensitivity.
