Lineup

TABLE

Generated: 05/11/2026

The round version of Lineup translates the collection's decorative strength into a more fluid shape suited to gathering. The hand-engraved metal structure, inspired by the precision of Italian high jewellery, supports the top with a light, rigorous and refined presence.

The top's decorative finish, based on resins, coloured pigments and natural elements, creates a deep, changing surface. Light, colour and material meet in a visual effect rich in tonal variations, giving each table a distinctive appearance and character.

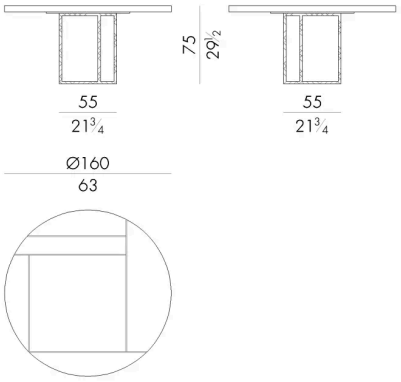

The round shape enhances the relationship between people and space. Lineup thus becomes a welcoming, sophisticated visual centre, where the discipline of the structure meets the expressive freedom of artistic resin, in balance with HESSENTIA's contemporary design language.

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
