Lilia

COFFEE TABLE

Lilia coffee table interprets marble through a soft, organic shape designed to soften the living area and introduce a fluid appearance into the space. Its amorphous top enhances the natural stone, revealing different veining, colours and depth in every variant.

The cylindrical, horizontally engraved metal base creates an elegant contrast with marble. The refined engravings of the metal introduce rhythm, visual vibration and continuity, making the structure a discreet yet recognisable decorative element.

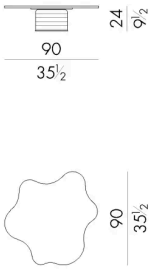

Available in three sizes, Lilia can be used individually or with other pieces in the collection, including marbles in different shades. Within HESSENTIA's design language, it is a sophisticated, versatile coffee table, which creates harmonious living settings through shape, material and proportion.
