Heron

COFFEE TABLE

Heron coffee table in wood and metal interprets the living area through a light, functional and refined language. Its poplar burl top enhances the natural warmth of wood through decorative grain, colour variations and a surface with a strong visual character.

The rounded, tray-like edge gives the top a soft, welcoming presence. Three cylindrical, telescopic metal legs with alternating polished and brushed finishes pass through the top and form an arch that can also serve as a handle for moving the table easily around the living space.

Within HESSENTIA's design language, Heron is a versatile, distinctive coffee table combining poplar burl, worked metal and attention to detail. Its discreet yet recognisable presence complements sofas and armchairs with balance, warmth and Handmade in Italy sensitivity.
